

Milx Is a New Form of Fresh Milk Concentrate

Milx Will Increase the Global Dairy Industry's Top Line Revenue and Gross Margins While Lowering the Industry's Carbon Footprint

Milx was developed with a major university in the U.S.

Reduces 6 tanker trucks of fresh milk to 1 flatbed truck of Milx Concentrate

Milk becomes lactose-free

6-month shelf life

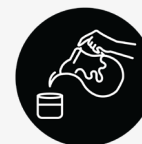

Commercially sterile

Reconstitutes to pure original taste, nutrition and texture (whole, 2%, 1%, skim, etc.)

Leverages existing dairy processing infrastructure

R&D pilot line available with patents

Sustainability + Profits = Milx

Milx Concentrate dramatically reduces the carbon footprint across the entire supply chain while maintaining taste, texture and nutrition profiles.

Opening New Markets

Coffee Shops, QSR, Vending Machines and Global Markets
Where Millions are Lactose Intolerant

Fresh rehydrated milk in all forms with taste, texture and nutrition intact

- Whole, 2%, 1%, and skim varieties
- 6-month shelf stable, non-perishable super-concentrate
- Reduces milk volume up to 84%
- Lactose-free rehydrated milk

New global markets to millions of new customers

- Milx technology removes all lactose. 75% of the world's population is lactose intolerant
- Sustainable marketing efforts can shift negative perceptions of milk

Dramatically reduces costs and carbon footprint across the supply chain including:

- Transportation (fuel, maintenance, insurance, labor, etc.)
- Refrigeration (energy and footprint)
- Packaging Materials
- Labor
- Waste Stream

Pro Forma For Typical Western Dairy Processor

Ask For a Free Pilot Line Evaluation for Your Processing Plant

Using **\$3.20/gallon** for milk (currently over \$4)

Plant produces **840,000** gallons/day

2% of raw milk intake offset by Milx pilot line

\$9 million in annual profits
